Mini Project - Medic

The project has created by using angular6, java Maven, etc,

Nowadays hospital appointment has been a major comic scene in

the hospital, so to overcome this problem there should be an

interface to be developed for booking an online appointment for

outpatient consultation at hospital, quality of hospital, best

suggestion for the disease consultant like best surgeon, best

doctor, low fee, etc., this app having a feature to be integrated with

existing Integrated Hospital Management System.

as well as doctor etc.., and Medic is a User-Friendly web

application.
